PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A small ammunition depot covering approximately 60 acres is 10 kilometers (km) south of the city of Ivano Frankovsk, adjacent to the Ivano Frankovsk-Nadvornaya rail yard (Figure 1). The depot probably services the army barracks located in Ivano Frankovsk, and is divided into two separate areas, a railyard and an ammunition storage area (Figures 2 and 3).

The unsecured railhead contains a possible storage building alongside the spur, two support buildings, and a general storage building. Explosives are probably off-loaded at this point

and trucked into the storage area.

The storage area is doubly secured with a guard hut at the entrance. It contains eight storage buildings ranging in size from 95 by 35 feet to 30 by 25 feet. Each building has a hardstand area in front. No earth revetments were noted. The area has excellent interior roads.

This installation was covered by [REDACTED] between [REDACTED]; no change has taken place in the area since [REDACTED]

DESCRIPTION OF INSTALLATION

Railroad Service

There is one rail spur from the main line. The railhead, Area A, contains one possible 170- by 45-foot ammunition storage building alongside the rail spur, two support buildings, and a general storage building.

Road Service

Good all-weather interior and exterior roads serve the installation. A new road has

been built from the storage area to the Ivano-Frankovsk highway.

Ammunition Storage Area

Area F contains four 95- by 35-foot ammunition storage buildings, three 45- by 30- foot ammunition storage buildings, one 30- by 25-foot ammunition storage building, and a guard shack. All buildings have hardstand areas in front; no revetments were noted.
